

REACH YOUR TRUE POTENTIAL!

Whole-body SHIATSU massager,
"Tsubo Healther"

SHIATSU AND STRETCH

Japanese SHIATSU

The word SHIATSU in Japanese means "using the hands to apply external pressure to the body." SHIATSU is a popular technique for stimulating health and body functions using only the hands.

The middle back contains a multitude of SHIATSU pressure points called "TSUBO". The most important are the tender points "TSUBO", which run along the spine and are marked by slight indentations. The application of pressure to the tender points "TSUBO" produces a pleasurable sensation of intense stimulation. At the correct level of stimulation, this can help to relieve stiffness, promote blood circulation in the immediate area and accelerate recovery from fatigue.

There are already many massage machines that seek to replicate the SHIATSU technique, but only Tsubo Healthier is certificated as a medical equipment in Japan, stating its unique approach to stimulating the body by reproducing the effect of applying "natural body weight" through the human hand, can genuinely recreate the gentle feel of a real SHIATSU massage, marketed in Japan with the effected efficacy of accelerating fatigue recovery, promoting blood circulation, relieving muscle tiredness, reducing muscle stiffness, alleviating nerve and muscle pain.

Stretch

Unnatural posture and stooped shoulders are an unfortunate adjunct to our modern lifestyles. Although we learn to sit in chairs from a young age, we often fail to sit with correct posture. Assuming the same posture for a prolonged period can bring on tiredness, the accumulated effect of which is the fatigue that is a common affliction of modern living. Unnatural rounding and twisting of the back causes chronic shoulder stiffness and back pain.

Guarantees a more pleasant and smoothing Japanese SHIATSU massage and stretch experience. Make it part of your life and discover the true meaning of relaxation.

"TSUBO HEALTHIER" FOR PRIVATE

"A 15-Minute Recharging Time"
into Your New Daily Routine

"TSUBO HEALTHIER" FOR BUSINESS

Work & Study

When you feel tired from housework, task, study, etc.

Fitness

Tsubo Healthier relieves muscle tension, before and after sporting activity. It is ideal for the pre/post-workout cool down .

WHOLE-BODY SHIATSU MASSAGER, "TSUBO HEALTHER"

Two sets of rollers - the head rollers for the upper body and the foot rollers for the lower body to provide a full SHIATSU massage experience.

Long-stroke SHIATSU massage

The whole-body massage helps to relax muscle tension over the entire length of the body from the ankles to the neck, using a combination of the revolutionary massage rollers, which locate the SHIATSU points. The built-in heater also warms the body to enhance the benefits SHIATSU pressure. Even though this unit is the double-fold type, its roller mechanism ensures continuous travel over the body length in both directions for a luxurious and uninterrupted massage experience.

Upper body SHIATSU and stretch

The head rollers work to flex the muscles around the spine. The massage is performed in the supine posture to ease up tension in the back muscles and make them more receptive to SHIATSU massage. The rollers gently raise the upper body during the SHIATSU massage to enhance the stretching effect.

Lower body SHIATSU

The foot rollers work on the muscles of the lower body, particularly the lower back, thighs, calves and ankles. Since the lower body is less conducive to pressure massage, specially-designed sand weights are placed on top of the feet and legs to enhance the SHIATSU effect.

Enhances massage effect

Weights can be used to apply pressure for a more effective massage experience. A person weighing up to 40kg should normally place one weight only on the knees; a person weighing over 40kg can use one weight on the knees and the other on the instep of the foot.

Heater therapy

It is well known that warming the body improves blood circulation and promotes metabolism, thereby maximizing the benefits of massage. Our whole-body SHIATSU massage machine features a built-in heater to gently warm the body to the optimum temperature for SHIATSU massage.

Compact and light to carry

Tsubo Healthier weighs only about 18kg. It folds neatly in half for transportation anywhere, anytime. It measures just 18cm in depth when folded for easy storage.

Easy to apply

The remote control can be used to program Tsubo Healthier without having to get up. Choose from three SHIATSU programs (upper body, lower body and full body), as well as whole-body SHIATSU, targeted SHIATSU and point SHIATSU.

Safety Design

Tsubo Healthier automatically shuts off after 15 minutes of use to prevent overdo.

MODEL ST

Model ST for gentle wide-area massage

Head rollers

The 32-wheel head roller unit provides wide coverage and envelopes the target area. The rollers are designed to accommodate subtle variations in body contours, enabling a perfect fit to any physique. Gentle roller movement in both vertical and horizontal directions provides a stimulating yet pleasant SHIATSU experience.

Foot rollers

The foot rollers are made of natural rubber that is designed to replicate the shape and touch of the thumbs. The natural rubber provides a firm yet comfort pressure and avoids the unpleasant hardness of some massage systems.

MODEL MT

Model MT for localized rhythmic massage with 2 advanced parttens, kneading and percussion

Head rollers

The six-wheel kneading/percussion roller unit moves from the lower body up to the neck, providing a powerfully healing rhythmic kneading and tapping massage. Four independently driven kneading beads work in unison to produce the ultimate massage experience that approximates the touch of the human hand.

Foot rollers

The foot rollers are made of natural rubber that is designed to replicate the shape and touch of the thumbs. The natural rubber provides a firm yet comfort pressure and avoids the unpleasant hardness of some massage systems.

MODEL DRT

Model DRT for firm whole-body SHIATSU massage

Head rollers

"The firm massage" comforts your whole underside of the body. The uniquely designed SHIATSU rollers are based on extensive research and development and are modeled on the shape and hardness of a SHIATSU practitioner's thumbs. Twin-axe four-wheel rollers, which are designed to replicate the thumbs of a SHIATSU practitioner, accurately and effectively identify the SHIATSU point (Tsubo) on the spine and in the surrounding areas and simply through their horizontal orientation are able to relieve muscle tension in the whole-body.

Foot rollers

The foot rollers are made of natural rubber that is designed to replicate the shape and touch of the thumbs. The natural rubber provides a firm yet comfort pressure and avoids the unpleasant hardness of some massage systems.

MODEL VS

Model VS for firm whole-body SHIATSU massage with 2 advanced vibration patterns, tapping and relaxation

Head rollers

"The relaxation vibration mode" gently relieves muscle tension, while "the Tapping vibration mode" delivers a pleasant vibration that rhythmically stimulations your peripheral nerves. The uniquely designed SHIATSU rollers are based on extensive research and development and are modeled on the shape and hardness of a SHIATSU practitioner's thumbs. Twin-axe four-wheel rollers, which are designed to replicate the thumbs of a SHIATSU practitioner, accurately and effectively identify the SHIATSU point (Tsubo) on the spine and in the surrounding areas and simply through their horizontal orientation are able to comfort your whole body.

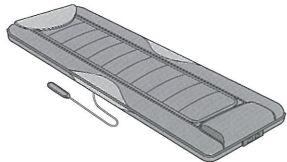

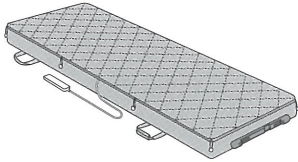

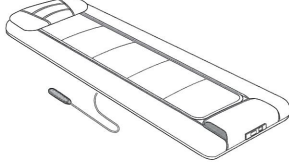

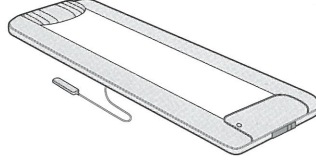

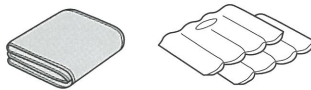

Foot rollers

The foot rollers are made of natural rubber that is designed to replicate the shape and touch of the thumbs. The natural rubber provides a firm yet comfort pressure and avoids the unpleasant hardness of some massage systems.
